SSAT Framework for Exceptional Education

Welcome from Mark Bailie

Dear Colleague

Welcome to the latest edition of World Class Education.

This edition once again showcases both the smorgasbord of opportunity available to our students, and the dedication of colleagues in all our schools.

May 2018 saw the Department for Education announce the latest round of Teaching Schools across England—Finham Park School's bid was judged to be successful and designation starts on September 1st 2018—congratulations to all involved! The 'Lion Alliance' will operate a delivery model where all our schools and additional strategic partners—Warwick University; West Coventry Academy; Coundon Court School; Rugby Free School; and primary schools—will collaborate in supporting and improving the education we provide, impacting on the wider system in Coventry and other key 'priority areas' in our region. This work will be delivered in three strands: Initial Teacher Training; School to School Support; and Continuing Professional and Leadership Development.

In this edition you will also be interested to read about the PiXL initiative at Lyng Hall; the 'Artists in a Shoebox' project at Finham Park 2; and our very own 'World Class' cheerleader: Amy Barson from Finham Primary

School who competed in the recent World Championships in Florida and won a gold medal with her England Team—let's hope our football squad are able to reach such dizzy heights in Russia next month!

Mark Bailie
Executive Headteacher

School Improvement Leader

Thank you to everyone who has contributed to the latest editions of World Class News and World Class Education. It's great seeing all the amazing learning opportunities the children have.

This term I continue to work with colleagues across all the schools in the Finham Park Multi Academy Trust. There are some exciting plans for this term as well as for September, including our first FPMAT Teachmeet on 10th July; more CPD opportunities planned; the new Teaching School Alliance; as well as a new Frog platform for the MAT.

If you have any questions regarding Teaching and Learning; CPD; Co-construction or anything else then please do get in touch!

Bernadette Pettman

Lion Alliance

Finham Park chosen to help train the next generation of teachers

Chris Bishop, Headteacher of Finham Park School was delighted to confirm they were successful in a bid to the Department for Education to form a Teaching School Alliance. This means that all the schools within Finham Park Multi Academy Trust, Finham Park School, Lyng Hall, Finham Primary and Finham Park 2, together with Warwick University, West Coventry Academy, Coundon Court and Rugby Free School are all now part of a successful **Teaching School Alliance**.

Teaching schools are excellent schools that work with partner schools in an alliance to provide quality school-led teacher training and professional development opportunities.

They raise standards through supporting other schools, especially those in challenging circumstances, and ensure that the most talented school leaders are spotted and supported to become successful headteachers. Teaching schools take a leading role in recruiting and training new entrants to the profession. We will be committed to identifying and developing leadership potential, providing support for other schools to bring about school improvement, and working with schools across our teaching school alliance to raise standards of teaching.

The Department for Education (DfE) has responsibility, in partnership with headteachers from the Teaching Schools Council, for the appointment of teaching schools and the quality of the teaching schools programme. There are now 800 teaching schools across England.

Lord Agnew, Parliamentary Under Secretary of State said: “I’d like to congratulate Finham Park—they should be very proud of this achievement. Teaching schools attract and train the best new teachers and develop the next generation of leaders.”

Finham Park MAT Teachmeet

FINHAM PARK
MULTI ACADEMY TRUST

Tuesday July 10th

Lyng Hall School

3:30pm

We will be hosting our first Finham Park Multi Academy Trust Teachmeet on Tuesday 10th July 2018 at Lyng Hall School. The event is open to all colleagues, both in and outside of the Finham Park MAT.

There will be an opportunity for staff to share pedagogy, strategies and experiences of High Challenge Classroom. This has been the focus for the current Teaching and Learning cycle which concludes this academic year. The Teachmeet will be a great chance to showcase the best practice across the Finham Park MAT.

We will be launching the new 3 year Teaching and Learning cycle in September

To register your attendance at the Finham Park Teachmeet, please enter your details via:

<http://finhamparkmultiacademytrust.co.uk>

<https://data.finhampark.co.uk/survey.aspx/CPD>

Please sign up by Thursday 28th June

Finham Park School were the proud recipients of not one, but two national awards!

TRANSFORMING PRACTICE IN
**Variety of teaching
approaches**

SSAT Framework for Exceptional Education

TRANSFORMING PRACTICE IN
**Principled curriculum
design**

SSAT Framework for Exceptional Education

Finham Park School was delighted to be accredited as a school that is transforming practice in the '**Variety of Teaching Approaches**' they use and in '**Principled Curriculum Design**'. This means that the school met the highest standards of the SSAT (Framework for Exceptional Education and that our work in this area is 'amongst the most effective practice nationally'. To achieve accreditation as transforming in practice, Finham Park School was reviewed by another high-performing school and an independent moderator from SSAT. Members of the peer review commented:

"The **climate** for learning across the school is **positive** and focused, with students demonstrating a desire to achieve."

"The practice observed is clearly **established**, embedded and sustainable as a result of ongoing developments that have been implemented over the past few years."

"A culture of open discussions about T&L is evident, along with the **absolute focus** on T&L across the school."

SSAT's Chief Executive, Sue Williamson comments "for a school to be accredited for transforming practice is a real credit to their team and the quality of the work that they are doing." It enables our school to further support other schools nationally in these areas whilst also continuing to learn about best practice nationally.

Den Corrall, our SSAT moderator, also provided wonderful feedback following his visits:

“I saw a **real variety** of approaches from a **very effective approach** to number work in a low set year 9 Maths lesson, to a **highly sophisticated** discussion in Year 12 Law Lesson and some very confident pupils in a Year 10 Mandarin lesson. In a recent visit to the school I saw some **inspiring** robotics work with pupils of all years and a literacy event for all Year 7s led by a local poet.”

“The **most impressive** aspect of Finham’s curriculum is that it has been developed to respond to the community and to some very principled decisions about a secondary curriculum for the 21st Century. Some examples of this are: The links to Chinese schools and the teaching of Mandarin to GCSE and A- level in key stage 4 and 5. I visited these classes and met the Mandarin teachers and was very **impressed**. They are one of the **pioneer** schools for Mandarin teaching in England and have built up an enviable reputation for the quality of teaching and the achievements of pupils.”

“The robotics teaching at Finham is **truly impressive**. Their robotics lab, which is a converted classroom, is an **inspiring** place to be.”

“I met many **impressive and enthusiastic** teachers and pupils who were clearly relishing the opportunities that Finham gives them. Staff are encouraged and given every opportunity to shape and review the curriculum and they do it in the context of Finham’s wider values of being a true comprehensive school with a local commitment and a global outlook.”

I personally, would like to thank those staff directly involved in the visits who opened up their classrooms and gave up their time.

By Alex Ford

Lyng Hall

PiXL Endurance

'There are no secrets to success. It is the result of preparation, hard work and learning from failure.'

Colin Powell

From September 2017, Lyng Hall became a PiXL (Partners in Excellence School) to support the teaching and learning in all subjects. Founded by Sir John Rowling, PiXL emerged in 2008 from the school improvement programme, the London Challenge. When government funding for the initiative ceased, the 50 member schools at that time decided voluntarily to continue with its model of collaboration around leadership and shared resources. PiXL has since grown to become the largest network of schools in England and Wales.

LYNG HALL IS NOW A MEMBER!

What does this mean for our school?

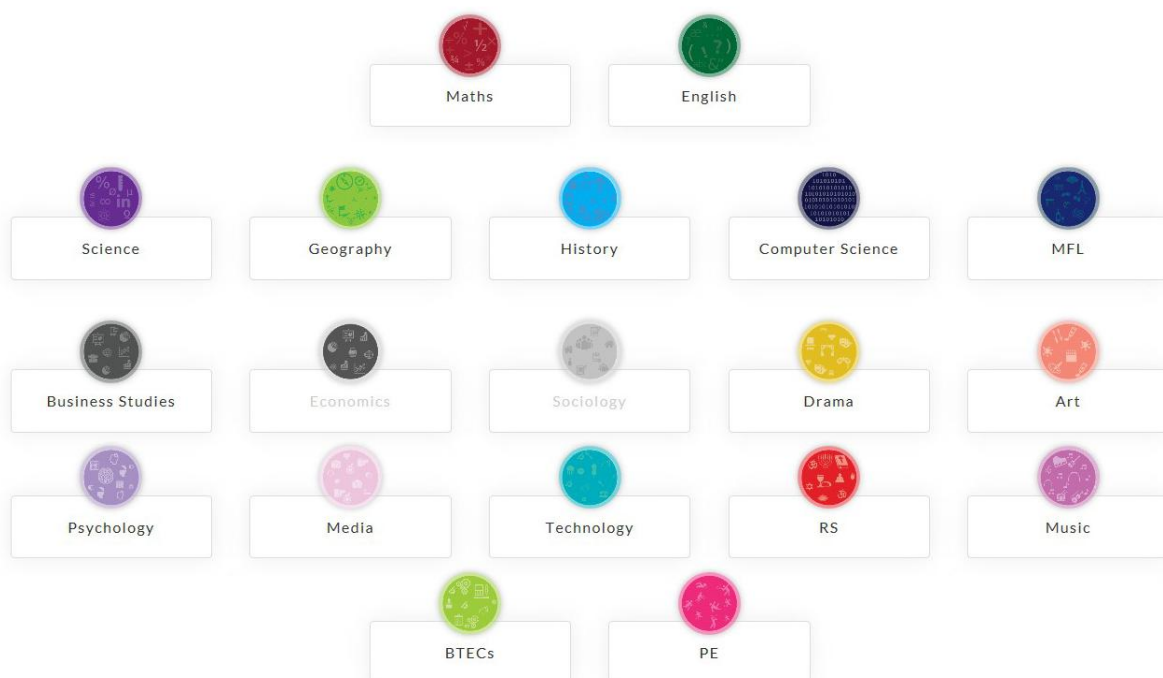

- Top tips for students on how to approach examinations in almost all subjects.
- Access for students and parents to high quality independent learning through APPs and web-based resources
- The ability for staff members to share practice at a national level
- Ideas on everything from supporting nutrition during examination season to improving reading stamina in all subjects.

Personal favourites of staff have been:

- Resources to help our pupils to revise at home
- Classroom APPs to engage students in class and at home
- Kindness notes from student to student and student to teacher in English and Humanities

Some Key Headlines...

PIXL provide resources for all sorts of groups of learners for most examination boards in most subjects.

Who does what?

Raising Standards Leader— **David Smith**—Basically, I'm the gatekeeper (forgive the Ghostbuster's reference) for all things PIXL and am ultimately responsible for the success of the programme.

Assistant Raising Standards Leader—**Sarah Faulconbridge**— responsible for ensuring PIXL materials are being used, updating Smith pro-formas and training staff.

Support for key students comes from our pastoral leaders— **Nathaniel James and Kylie Ingram** will be taking a lead on ensuring a more holistic and pastoral approach using PIXL materials—more to follow shortly.

Directors of Learning for all subjects, especially Maths and English are responsible for the sharing of all PIXL strategies with teachers, students and parents

It has been great to see:

- Maths' revision sessions, including breakfast club, specifically targeted at V2 (Maths' intervention students).
- Students taking tests in Science that are marked externally and ranked alongside every other PIXL school. Congrats to all in Science for results that show we outperform the national average for all PIXL schools.
- Assemblies promoting positive strategies for dealing with examinations at during what can be an emotional period for all concerned.

These are some examples from English:

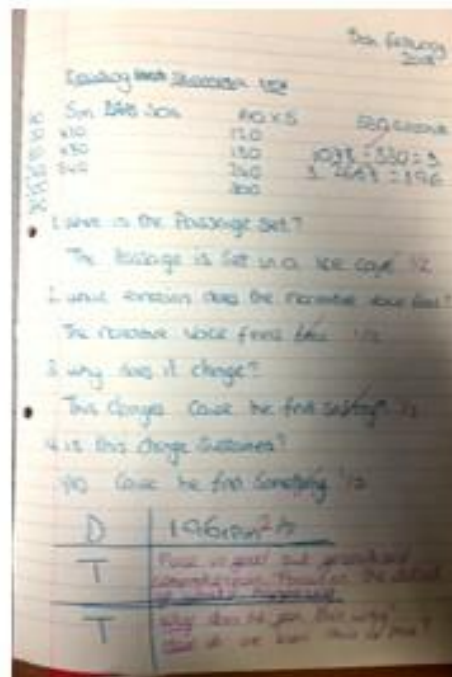

Review Week 1 - 14th February

FOCUS 1 -

Pace and timing is a concern – speed endurance tasks will be built in from 13/02 to support this limitation.

8th Feb – Reading Stamina and Comprehension Test revealed that she had the relevant pace, as it was in excess of 120wpm. However, there was a limitation on her reading comprehension. Therefore, although she was reading through she was not processing what she was reading, or inferring only limited/basic ideas.

Next stage therefore is focus on paced reading activities that focus on annotation of key ideas. Providing her with a structured frame so she is reading with a clear purpose and therefore focused on comprehension rather than just getting through. She will need to decrease her reading pace to account for this practice.

Content and organisation - Strategically seated with students one level and two levels in front – enables peer comparison of responses to support progression.

their writing. This is the first of repeated drills that will support in increasing their pace and timing.

Clear atmosphere was developed in time allowed – supported by the generation of ideas with her partner.

Next stage is to focus on the technical starts of her sentences to improve cohesion and fluidity.

13th Feb – Students using writing bootcamp style grid and activity are focused on the stamina and endurance of

‘By failing to prepare, you are preparing to fail.’

Benjamin Franklin

PiXL prompts students to reflect on what factors affect our ability to perform, such as:

- Our goals
- Ability to manage stress
- Mental energy
- Quality of sleep
- Whether we feel rested and recovered
- Physical activity
- Nutrition

These are all factors that should be addressed as well as how much revision students do. Schools are provided with a range of strategies which they can use with students to ensure that they are fully prepared physically and mentally together with the skills and knowledge required.

Staff and students at Lyng Hall School have used strategies shared by PiXL to good effect as they prepare for this summer’s examinations.

‘Champions do not become champions when they win the event, but in the hours, weeks, months and years they spend preparing for it. The victorious performance itself is merely the demonstration of their championship character.’
Alan Armstrong

If you would like to find out more about this or have any queries about PIXL and its use then please contact:

Star Studded Celebration of Success!

On Thursday 3rd May, Finham Park and Finham Park 2 celebrated some incredible successes at the annual Star Studded Celebration Of Success at The Welcome Centre in Coventry.

Students and staff alike dressed in their finest to enjoy the evening, hosted this year by Suzie Green, Director of Maths, and Andy Ditch Assistant Headteacher at Finham Park. A number of esteemed guests were invited to the event, including the Deputy Lord Mayor, Councillor John Blundell and Deputy Lady Mayoress, Lindsey Blundell; Peter Burns, Chair of the Finham Park Multi Academy Trust Governors; Catherine Colby-Johnson, Chair of Governors for Finham Park 2; Jane Long, Chair of Friends of Finham; and Mark Bailie, Executive Headteacher of the Finham Park Multi Academy Trust.

Both Chris Bishop and Russell Plester, respective Headteachers at Finham Park and Finham Park 2 spoke with immense pride about the achievements of their students and how delighted they were to see so many young people excelling in their academic and extra-curricular activities.

The evening also saw a number of superb performances from students, including two exceptional musical interludes and a very impressive dance from some of our Mandarin Excellence Programme students.

The evening culminated in students taking to the dance floor and watching a magician in an interactive magic show. It was a delight to see young people from Year 7 right through to Year 13 enjoying the evening together.

A special thank you was given to Jane Long, Chair of Friends of Finham who is stepping down at the end of this year.

We'd like to thank the local businesses who sponsored the evening, making it possible for students to celebrate in style.

Chemistry Bake off

In Science, 7a were tasked with a range of homework options, one of which was the opportunity to create a chemistry inspired cake. This year we set a school record, we had over 20 fantastic, lovingly made science cakes!

As a class we were very happy with this outcome but we had to put our game faces on to try to wade our way through all of the tasty treats. As they say, not all heroes wear capes!

Consequently, I would like to take this opportunity to thank all students and parents for using your chemistry knowledge to design, create and decorate such a fantastic range of science inspired cakes.

By Matt Hudson

Artist in a Shoe box

Year 8 students were set the challenge for homework to research an artist and create their own piece of art to represent them.

Guest Writer

Chloe Buckenham

It has been over 13 years now since I took the leap into teaching from the Law.

I am often asked by students why I made the switch and the honest answer is that it was not entirely planned nor are the two career paths entirely distinct! Having said that, it is one of the best decisions that I have ever made, as although I still remain a strong advocate of justice and have an active interest in legal and political issues, actually, the work we all do in our schools is where the pivotal changes in young people's lives really takes place.

Having joined Finham Park in September into a completely new role as Assistant Head for Support and Experience, I quickly realised, even more so than perhaps I did in my previous post as Head of Sixth Form that pastoral care and behaviour management goes far further than just 'making kids behave' in school and getting them onto the next steps in their academic careers. So many of the young people that fall foul of the law in later life have done so because they have not been lucky enough to have strong role models, secure home lives and people that care and cherish them as individuals. Our new approach at Finham, using Restorative Justice to help empower our students to understand, take ownership and correct their own mistakes is proving to make real changes to how our students view themselves and the world around them. Helping young people realise their

potential and make positive changes because they *want to*, not because they are told to, is at the heart of pastoral care.

At the other end of the spectrum I am also on a crusade to empower students in leadership roles and am so proud of the work that the MATSL students are already doing. I am passionate about allowing young people to realise their aspirations and believe that modelling enthusiasm, drive and innovation opens student's eyes as to what is really possible.

After half term our new Finham Student Council will be launched, a forum where students will take control of change, become true leaders of the school, confident public speakers and ambassadors for our new core values and I am determined through doing this to ignite more young people's interest in politics and the difficult issues we face, not just in our society but globally as well.

In February of next year I will be leading an expedition to Uganda to the Jinja 2019 Youth Conference. I am a huge advocate of learning outside the classroom and have spoken openly with students about my first experience of visiting the developing world. I want our students to understand now, before they leave school how precious life is and how lucky they are to have the amazing opportunities we offer across the Finham MAT. I want them to embrace every single chance that they get to be successful and really take responsibility for driving forward our new core values. In my opinion, seeing a developing society truly gives students a global view and I have seen radical changes in the young people that have been involved in the programme so far in my previous posts. I hope to continue to drive new initiatives, to keep our focus on 'the love of learning' and to be a strong leader in driving the ethos of the Finham Park MAT.

By Chloe Buckenham

Finham Primary Choir

The Arts Centre audience at the Coventry and Warwickshire Youth Orchestra and primary school choirs' concert on Sunday May 6th certainly enjoyed a delightful treat. The musicians were exceptional, serenading us with popular classics and music from shows and films with great aplomb and professionalism; the combined choirs of 6 Coventry primary schools, including Finham Primary's very own 19 strong chorus, were a delight.

The children sang with such clarity, enthusiasm and confidence that the audience were spellbound. Rehearsals in school and the five joint evening practices, culminating in a final rehearsal on the day at Warwick University with the Coventry and Warwickshire Youth Orchestra, delivered a performance to remember. It was a day of hard work and dedication for the children but a great day was had by all.

Taking part in a professional performance of this calibre in the spacious Butterworth Hall, in front of a large audience of family and friends, and the thrill of experiencing first-hand the swell and boom of a live symphony orchestra is something the children will never forget.

The singers were alert and well-versed and delivered their pieces ('Mr Blue Sky', 'I am the Earth', 'Si Nijay, Nijay, Nijay', 'Feed the Birds', and 2 compositions by local composer Robert Ramskill, 'The Big Bang' and 'Patterns in the Sky') with great enthusiasm, sometimes singing in two-part harmony and at times displaying some pretty tricky armography!

The behaviour of the children on the day was exemplary. During the interval some audience members commented on the fact that they could hear every word the children were singing—praise indeed!

The icing on the cake came at the close of the splendid 'Radetzky March' finale when the audience rose to their feet to give a well-deserved standing ovation to the whole company. Thanks must go to the teachers, helpers, organisers, particularly Brian Chappell, leader of the Coventry and Warwickshire Youth Orchestra, the parents whose help and support is invaluable and, of course, the fabulous children.

By Ms Pritchard

FINHAM PARK
SCHOOL

Lake District

Earlier this term saw the launch of our new push on independent learning skills. So often students go into Year 11 and 12 with so little idea on how to manage study time and how to actually embrace their love of learning that we felt it was time to begin to tackle this!

Our aim is to teach students how to do research properly before they get into Year 11 so as they can become the masters of their own learning. We want to teach our students how to break down information and to show them how they learn best. We want to challenge and stretch our students so they become inquisitive, self-directed learners.

The first step in this process began with our Stretch and Challenge Conference for Year 10 to Patterdale Hall Outdoor Centre. Here students chose a number of cross curricular and extension seminars to attend. They began to see what it is like to be in a more 'tutorial style' setting and the types of study that they would be expected to do Post 16 and beyond.

Students were introduced to the wonderful world of the MOOC and encouraged to broaden their research parameters away from Google alone! Every student who came on the trip is now undertaking their own mini EPQ style research project and we are looking forward the presentation evening in the summer to showcase these projects.

Whilst on the trip students also took part in a number of outdoor pursuits designed to challenge them both physically and mentally. As well this we put students in unfamiliar circumstances and shared living spaces – a great university preparation exercise! The feedback from the trip was great and we hope to repeat a similar version with the Sixth Form next year.

By Chloe Buckenham

Race for the Line

Over the course of the Autumn Term, all of Year 7 have been part of a national challenge called 'Race for the Line'. Their challenge was to build a car from a base model that would be the fastest in a drag race.

The students worked in teams of 4 and had to analyse the aerodynamics of their car and engineer it to the best of their ability.

Each of the cars would be rocket powered on the day to give the cars the thrust needed. Lyng Hall final enabled students to test their designs and win a place in the Regional Final at RAF Cosford.

Students were given the starting controls and a rocket was placed into the car to give the cars the acceleration.

The main challenge on the day was being able to keep up with how fast the cars were going with their rocket propulsion.

A group of 4 students attended the regional final at RAF Cosford to build a new model from scratch and race against 25 other schools from across the West Midlands Region. It was an amazing experience, even though our team of rocket scientist and engineers didn't make it to the national final—this time!

Going for Gold!

I began my cheerleading life at 4 years old with my family's group The Gemini Cheerleaders. Throughout my formative years as a Cheerleader our team grew in strength culminating in numerous National Titles which would lead us to competing on an international stage via the European Cheerleading Championships. I was fortunate to attend numerous European Competitions, twice held in Manchester UK but also as a result of my teams success visiting countries such as Russia, Italy, Sweden on two occasions, Finland, Norway & Denmark.

As I grew older my love and passion for Cheerleading led me to begin my coaching qualifications, I began coaching from age 16 and once fully qualified I was soon teaching in numerous schools in both Coventry & Warwickshire at after school clubs promoting what a wonderful sport Cheerleading is. This experience gave me terrific pride on behalf of my team, but also knowing that I was spreading something very special to so many was most gratifying.

The year 2008 was to prove a decisive year as at the National Championships I was awarded a huge honour, the title of Coach of the Year, praise indeed, this accolade was swiftly followed by another huge compliment as, at the try outs for the Team UK

squad to appear at the World Championships, I was selected to represent my country in Florida USA. In a hugely competitive competition Team UK were to finish 6th, a position they had never previously achieved, my love for the world stage had been ignited, I was hungry to be the best I could.

In recent times my own Gemini Cheerleaders team has continued to develop and grow stronger, we currently attend numerous competitions around the UK returning home to Coventry with many title winning banners, something which gives us all great pride. On a personal note I was offered the opportunity to coach the Coventry University team a little over a year ago, a team that had struggled previously, in this season which has just finished, my first full season in charge, I coached them to their first ever University National Title.

In 2017 I once again attended the World Championships in Florida representing Team England, we were narrowly beaten into second place but taking home a silver medal was swiftly followed by an invitation to become coach to Team England for the 2018 Championships.

Throughout the long winter months athletes from around the country would meet up with one common goal, to be winners on the international stage, the sessions were very enjoyable but all along our focus was on Florida in April of 2018. Then after months of hard work and determination we took to the World Championships floor, the wait for results seemed to take forever but then when we heard in 1st place Team England all of those long training sessions had become so very worthwhile, we were World Champions, we had took on the best the world could offer and we had beaten them, Team England are World Champions and I will forever have that memory to take with me throughout life.

If you want something enough your passion and hard work will achieve that goal and I cannot thank Finham Primary enough for their support and love on my return as a World Champion.

By Amy Barson

FINHAM PARK
MULTI ACADEMY TRUST

Engineering Education

5 students from across the FPMAT that are studying A Level Physics have been working on an engineering project with the RAF in their centenary year.

Amardev Balrey, Jodh Gosal, Joey Lau, Ewan Jewkes and Vinesh Vignarasa have been looking at saving aircraft engineers both time and money when working on aircraft by researching, designing and building a tool delivery system. The “RAF Runner” can be programmed to collect tools from a central tool store and deliver them to an aircraft bay where an engineer will work on the aircraft. This currently costs the RAF about £25 per day for the average engineer, providing an option for cutting costs but saving jobs as funding becomes tighter.

The team began their work in October, about 4 weeks later than all other teams from the West Midlands region. However, the team did not see this as a set back and worked until 5.30 every Thursday until a residential workshop at Birmingham University in December. Here the students got a taste of life at university and got to build their system in the purpose-built workshops at the Edgbaston campus. Although the weather was bad (and most schools and colleges in the region were closed) the students managed to accomplish what they had set out to over the 2 days.

As the team have been working to a tight budget, almost all of the materials used to build the runner were recycled or made from part recycled materials.

From January until March, the team collaborated and brought together all their findings to write a 35-page engineering report. This has been read by the Major John Randall of Defence Munitions Kineton, where the STEM mentors are based.

On the 4th of May, the EES came to an end when students got to attend a celebration and assessment day. The day started early, with students setting up a stand to show off their work and delivering a presentation to a panel of engineering experts that critiqued their project. Team Finham were interviewed at their stand by Major John Randall and received fantastic feedback of how the students had a solid plan, answering questions about how they would improve their clearly and with a high detail of scientific understanding.

All 5 have received an Industrial Cadets Gold award, inspired by HRH The Prince of Wales, ensuring that young people develop skills that can be illustrated to potential employers through this award. Each of the students are now applying for a BSA Gold CREST award to highlight how the work they have completed contributes towards the scientific or technological community.

As a team, we would like to thank the RAF for their support and opportunities that they have provided our students, including a visit to RAF Cosford and a personal tour of a hangar – including time for each of the students to sit in a RAF Jaguar-13 jet. We would also like to thank Amtico, who sponsored our team in the background to allow our team to take part in the project.

We will be looking for a team of students to take part in next year's EES scheme, and an application process will begin shortly.

Team photo RAF Cosford:

FINHAM PARK
SCHOOL

Finham Park Film Festival

FINHAM PARK 2 

The Finham Park Film Festival 2018 may have been a small film festival, but it had big aspirations. When we first started teaching Film Studies at Finham Park, we encouraged students to have the highest expectations of their work, and to enter films for local competitions. When the students started winning, we encouraged them to enter national competitions. In the last four years, Finham Park students have had five student films nominated for national prizes, including their first winner last year, Jack Brazil, now in Year 12. The bet between Mr Hartshorn (first Michelin-starred school Food Tech department) and Mr Gunn (first mention in an Oscar speech) is well and truly on, with FP2 students cooking yet another superb three-course meal this year.

The school wanted to use this festival to showcase some of these fantastic films, show the wider community just how much potential they have, and inspire the next generation of students to aspire to even higher goals, and believe that they too can make it. The department's aspiration is to make Finham Park school a centre of film-making excellence, despite the current squeeze on Arts in the National Curriculum. At last year's festival, we declared that we wanted the Finham Film Festival to kick-start this process of recognition, and ignite the #Coventry2021 bid for City of Culture. Eight months later, Coventry won. Coincidence? We don't think so!

This year's festival prizes were judged by a panel from the film industry. Anna Andrews' work as an Executive Producer at ITV is well-known, as is Ali Bannister's work on Steven Spielberg's War Horse, though Sean Hartofilis, independent New York film-maker, will be less known. However, Josic Cadoret's work funding new talent at BFI Film London will become much more prominent now that he has been [announced as one of the six regional talent executives by the BFI](#). Students nominated for awards had the opportunity to talk to him, hear from their heroes, and get tips on how to be at the forefront of Coventry's 2021 bid to become UK City of Culture: "21 in 21", they could literally be the next generation of film talent to put the city on the map.

Finham Park 2 made their first appearance at our Film Festival, with Emily Gunn and Freya Plester taking home the prize for Best Enrichment Music Video. The Best Year 9 Intro Sequence was won by Inez Williams for her final film of last year, while her classmates Alex Flamson (Thriller) and Lenore Court (Horror) shared the Best GCSE Film Intro Sequence prize. Our Best AS Short Film this year went to the sumptuously shot "Coven" by Caitlin Wheatley, her first nomination at our festival. But the real applause was reserved for the smorgasbord of delight offered under the Best A2 Short Film category, with a rockumentary (Get Carta), a moving reflection on loss (Coping) and three superb comedies. The prize went to last year's Year 12 champions, Joe Jurczak and Matt Betts, for their short film Meta-Morphosis, a film about the difficulties of making short films!

All of this year's entries can be viewed on the department's Youtube channel: <https://www.youtube.com/user/Finhammedia/playlists>

We hope to see the standard get even better next year!

By Mike Gunn

Lyng Hall

Poetic Justice!

Two Year 11 students from Lyng Hall School had competed in Warwick University's Two Chairs Writing Competition earlier this academic year. Shanua Alam and Erik Ionnicescu were just two of over 150 entries from across the country.

Their entries had so impressed judges, that they were both recipients of the Special Commendation Award.

In recognition of their achievement, Shauna and Erik were invited to Oxford University where a special day was planned for them. They spent a day at New College, Oxford University, where Harry Potter was filmed. During the day they worked alongside two renowned writers, Hanna Issa and Ian McMilla. They explored new forms of writing poetry.

One of the highlights was when their poems were read aloud by the judges, which moved some members of the audience to tears.

By Mr Ivanov

Year 9 Girls Rugby

The Year 9 Girls Rugby team recently participated in a full contact rugby competition against a range of private and public schools based in West Midlands and Warwickshire. The teams they played against consisted mainly of Year 10 students.

As this was our first fixture and competition we were excited to test ourselves and a little bit apprehensive as we had not played as a team before. This apprehension did not last long as we quickly confirmed that we have a team full of confident, supportive but hard playing young ladies.

They pulled together as a team, led themselves and put their bodies on the line in all four games. This dedication, spirit and commitment enabled us to win all four games and end the tournament undefeated against students a whole year older than themselves.

To finish off a perfect day, over half of our school team had to rush off at the end of the tournament as they were being flag bearers for the women's international 6 nations game (England vs Ireland) being hosted at the Ricoh Arena. Additionally, the rest of the team, myself and their parents were in the stands, cheering on our students and watching England win against Ireland.

On a personal note, this will be a day I remember for the rest of my career and life. The girls were faultless for the whole day and they made myself, their parents and our school very proud. Well done girls!

Plas Dol-y-Moch

53 children from Year 5 and 7 teachers went to Plas Dol-y-Moch in Maentwrog, Wales. The journey began on Friday 20th April with a later than planned exit from Finham due to traffic problems. Luckily, the 4 hour journey some stunning views in the evening sunshine. On arrival children had dinner and quickly made beds and got ready for a late bedtime of 11.30pm.

Everyone woke up sprightly on Saturday morning and got ready for Day 1 of activities. A beautiful sunny day lay ahead with children going off rock pooling on the beach, kayaking, orienteering, mountain walking, exploring a slate mine and biking. Temperatures reached 24 degrees so sun cream was needed which doesn't normally happen in Wales!

After dinner children completed their jobs, before one more activity around the centre then bedtime. Day 2 and Day 3 consisted of the children completing activities previously mentioned in weather that is the usual in the Welsh mountains but this did not affect the

children's enthusiasm and enjoyment of everything they were doing. Every night teachers fed back to the whole of year 5 regarding how individual groups got on and it was brilliant to hear such positive experiences had by all.

The children showed great responsibility in looking after themselves and completing their jobs, showed respect to the instructors and in looking after the Plas Dol y Moch house and grounds, and showed great resilience in all the activities they completed. Journey back home on Tuesday 24th April went without travel sickness, which is a first for me so happy days all round!

Catering Technology Visit

As part of their GCSE Catering, Mrs Finn's class were invited to Hogarth's hotel in Solihull.

We were treated to a tour of the hotel and its grounds, it's facilities and staff.

(Year 11 Catering Class
2018 – Emma Griffiths,
HR on the far left)

Students were shown around the banqueting suite, guest rooms and kitchens and had the opportunity to speak to staff about their roles and careers.

Here we are taste testing to identify the different foods.

Very many thanks to Emma Griffiths, HR who organised the visit to Hogarth's hotel and arranged all the activities. We look forward to attending the Year 11 prom next term!

National Apprenticeship Week 5th –9th March 2018

Finham Park School celebrated this annual event by inviting former students who have successfully progressed to apprenticeships, to deliver assemblies and to speak in subject classes.

Esherveer Sagoo left Finham Park School after AS levels and progressed to a higher apprenticeship with the Manufacturing Technology Centre (MTC). He attended with his Manager, Matt and both passed on valuable advice to our engineering students about how to apply for careers in the industry. Esherveer has progressed to BTEC Level 3 qualification in Engineering and is a proud STEM ambassador for schools and went on to pass his driving test later that day!

Deniz Uzun left our 6th form after studying A levels and is now embarking on a Degree Apprenticeship with Jaguar Land Rover. Currently a second year apprentice, Deniz is working as a Cost Engineer. She showed us a very informative video and is a positive role model for more females to consider engineering as a future career.

Harry Packer – Right Check – t4 Connex

Another former FP student, Harry, works for Right Check, t4 Connex, a Technology and Innovation Company. Passionate about IT and systems, Harry works with the latest mobile technology for businesses to use to interact with their employees, their customers and suppliers.

We are very proud of all of our students who gave up their time to return to school and talk about their current roles. They all enjoyed speaking to students and staff and this has been valuable for their own competences in the workplace. Many thanks to them all and their companies, for allowing them to participate.

It has been a busy half term in the library with the student librarians working harder than ever. Last week, they undertook the challenge of preparing 400 books to go out onto the library shelves.

It was a hard task as there are so many different processes for each book to undergo before it is ready to go on the shelf and be loaned. The students worked really hard and exceeded their goal by working before and after school, and at break and lunch times. They were rewarded with a special lunch at the end of the week which was very much deserved.

We have now added a magazine area to our Library which is very well used. We have a range of titles for the students to look at from 'Wonderpedia' to 'Empire'. If anybody has any suitable magazines that they would like to donate to this area they would be much appreciated.

We were pleased to invite in to the library some of our neighbours from local businesses for an afternoon tea. We were particularly grateful to the employees from Zenith Contractors Ltd and Clements Plant & Tool Hire Ltd who took the time to come and look around the library and the rest of the school and meet with Mr Plester, Mrs Brake, Mrs Kerr and Zak Mills (Head Boy).

HS2

We have initiated a partnership with one of the lead contractors on the HS2 project, LMJV. We are really fortunate to be working with them as this will lead to many great opportunities for all of our students.

We have already had two representatives attend Year 9 geography lessons to talk about HS2 and it's impact on the area in which we live. Students were really engaged in the talks and asked some fantastic questions.

Our next engagement activity is in the last week of half term, when some of our engineering students will be lucky enough to visit the HS2 build site in Birmingham as well as the Engineering faculty at Birmingham City University. We will be joined by the Education Manager for HS2 Ltd and employees from various subcontractors. It will be an amazing experience, which will then be rolled out to all schools across the Finham Park MAT.

The Porridge Pot

In March, Year 2 and 3 came together to put on a performance called 'The Porridge Pot' The story centred around fairy tale characters in the midst of a crime wave! It was all down to Detective Spratt and his friends to solve the crime and work out who was behind all the dodgy dealings that were destroying the forest.

The play contained numerous toe-tapping tunes, heart-warming dance routines and many comical moments that kept the audience laughing.

The children managed to learn their lines in just 3 weeks, which was a spectacular achievement for the actors. Both year groups worked incredibly hard and wowed their friends and families who came to watch the performance.

Well done Year 2 and 3!
